

Recycling Batteries

Safety Instructions

- Wear safety glasses and protective gloves when working with batteries
- If batteries leak, don chemical resistant gloves, safety glasses and use chemical spill kit

Directions

1. Lead (Pb) Batteries, Nickel Cadmium (NiCd) Batteries, Lithium Ion (Li) Batteries and Alkaline Batteries are stored in separate containers.
2. Batteries will be kept in marked **five gallon pails**.
3. When 5 gallon containers are half full, inform supervisor/manager so that Heritage Crystal Clean can be contacted to arrange pick up

Minimum Frequency

1. All Battery types
Containers shall be inspected at least **monthly**; more often depending on usage.
2. All Battery types
Containers shall be emptied at least **annually**; more often depending on usage.
